

**Additional Activities for Home and School
Wings Over Sabino Kit**

1. Journals- individual or class project: Record what you observe. Include, date, time, weather conditions, a description of the observation. Drawings or photos may be included.
2. Build or buy a bird feeder or hummingbird feeder. Hang it in a place where you have the opportunity to observe it often. Record what birds you see and when.
3. Build or buy a bat house. Instructions are available in many books or on the web.
4. Encourage student to draw or photograph nature. Create a classroom exhibit of the students' work. Older students set up and change the exhibits.
5. Plant a garden to attract birds or butterflies. Preferably use desert-adapted plants.
